Storefront: kintampoafrikanmarket.com

1. Daily checklist

1. Open **Dashboard** — check “Needs action” and “Ready for pickup” counts.
2. Open **Orders** — today’s orders; unpaid phone orders show an **Unpaid** badge.
3. Stage pickup bags → mark **Ready for pickup** → print bag ticket if needed.
4. Local delivery: update status when you leave and when you hand over.
5. Ship orders: print label or address slip, then mark shipped / enter tracking.

2. Orders — three fulfillment types

A. Store pickup

1. **Orders** → open the order.
2. When packed: set **Ready for pickup** (email only if customer has a real email).
3. Print the **pickup / bag ticket** (4×6 label or letter).
4. Hold window is **4 hours** after ready — overdue shows on the pickup panel.
5. When collected: **Mark as picked up**.
6. Optional: resend ready notice, Call / SMS / WhatsApp from the phone number.

Customer may have chosen: pickup window (today ASAP, after 3pm, tomorrow) and substitution preference (refund / call / substitute). Follow those on the order.

B. Local delivery (you drive)

1. Confirm address is in range and order meets the **\$25 minimum** (before delivery fee).
2. Tip (if any) shows on the order — keep for the driver.
3. Use the **delivery run** panel: en route → handed over / left at door.
4. Call the customer from the order page if needed.

C. Ship (USPS / Shippo)

1. Print address slip or buy a Shippo/USPS label from the order.
2. Mark **Shipped**; tracking email goes out when configured.

3. **Admin** → **Shipping**: confirm Shippo is connected. Click **Connect tracking updates** once if delivered never auto-updates.

3. Phone / WhatsApp / in-store orders

1. **Orders** → **New order**
2. Search products, set qty, choose pickup / local delivery / ship.
3. Name + reachable phone (email optional).
4. Mark **Paid** or **Unpaid** (cash / Zelle / card at store).
5. Save → opens the order. Collect later with **Mark paid**.

Unpaid orders do **not** count in Dashboard gross revenue until marked paid.

4. Short items / partial fulfillment

1. On the order, open items fulfillment.
2. Set how many of each item you actually handed over.
3. Confirm: Stripe → card refund; cash → hand back; unpaid → collect less.

5. Products

1. **Products** → **Add / Edit**
2. Name, price, category, images, **In stock**.
3. Optional: brand, stock quantity ("Only X left"), unit size for \$/lb, variant group for size picker.

6. Announcements

Admin → **Announcements** — edit top-bar messages, links, active/sort. Customers can dismiss the bar on their device.

7. Customer pages (share with shoppers)

Page	Path
Shop	/shop
Track order	/track-order
FAQ	/faq
Shipping	/shipping
Returns	/returns

Page	Path
About / visit	/about
Recipes	/recipes
Kits	/bundles

8. Refunds

Payment	What to do
Stripe (online card)	Order → Refund → amount → confirm
Cash / Zelle / phone paid	Order → Manual refund after you returned money
Unpaid phone order	No refund — cancel or adjust quantities

9. Shipping setup (owner — once)

1. **Admin** → **Shipping** — provider should show Shippo (or USPS).
2. Ship-from address = store address.
3. Click **Connect tracking updates** once so delivered packages auto-update.

You do **not** need to change this page every day.

10. Security

- Do not share the admin password.
- Log out on shared computers.
- Never paste webhook URLs or API keys into chats or social media.

11. Quick troubleshooting

Issue	What to try
Customer says no email	Phone orders may have no email — call/text instead
Pickup ticket prints tiny	Use 4×6 / label PDF from print slip
Local delivery blocked	Cart under \$25 or address outside ~30 min drive
Dashboard revenue looks low	Unpaid phone orders excluded until marked paid
Brand filter empty	Fill brand on products in admin

12. Who to call

Owner: _____

Tech contact: _____

Support email: _____
